

# Electrotechnology Class Excursion

20<sup>th</sup> February 2019

Our Electrotechnology students had the opportunity to visit CNW, an Australian owner electrical wholesaler. It was great for the students to get out of the classroom and workshop and delve, ever so slightly, into the real world of electrical suppliers.

They were able to tour the store and see how the electrical industry is made up of a lot of moving parts. It showed the students how important the working relationship between a sparky and his supplier is. Russell, the branch manager was great and gave the boys a fantastic insight into how this side of the industry works.

Back at Ranges TEC, our electrotechnology students were the first group of students to transition into our new factory where they have been learning skills quickly, starting with some basic OHS and wiring. It is pleasing to see the relationships beginning to form amongst the students and with their teachers.
